

Status Video Preset Settings Sheet

Category	Recommended Setting	Why It Matters
Aspect Ratio	9:16	Perfect for vertical formats like WhatsApp Status
Resolution	1080 x 1920 (1080p)	Sharp visuals without large file size
Frame Rate	30fps	Smooth playback, suitable for most phones
Duration	Max 30 seconds	WhatsApp Status limit
Photo Count	10-20 (depending on beat speed)	Keeps visuals fast-paced and interesting
Audio Format	MP3 (128kbps or higher)	Good balance of quality and file size
Export Format	MP4	Universally supported across devices
CapCut Ending	Remove	Clean professional finish
Transitions	Smooth (e.g., fade, slide)	Keeps video cohesive
Effects	Optional (e.g., Blur, Glow, Zoom)	Adds emotion or trendiness
Keyframe Graph	Ease In, Ease Out, or Custom	Makes animations fluid and cinematic
File Size Target	Below 20MB	Quick to upload & doesn't eat up mobile data

Bonus Tips:

- Compress final video using an app like Video Compressor Panda (Android/iOS).
- Preview video before exporting to check beat sync alignment.
- Avoid overloading with too many effects-simplicity often wins.
