CapCut Effects, Fonts & Animations Fix - One-Page Checklist

Follow these steps to fix missing effects, fonts, and animations after export.

1. Confirm the Issue: Export a short test clip and check if effects/fonts vanish.

2. Log Out: Go to Me → Settings → Log Out of your CapCut account.

3. Enable Business Creator Mode: Reopen Settings and turn it ON.

4. Restart CapCut: Close and reopen the app completely.

5. Test on New Project: Add custom font & effect → export → verify.

6. Revive Old Projects: Use CapCut for 20–30 minutes before re-export.

7. Optional Quick Fixes: Clear cache, reinstall app, or change export settings.

8. Device Tips: iOS - check after updates; Android - disable battery optimization.

9. Prevention: Keep Business Creator Mode ON and back up projects to cloud.

10. Backup Plan: Export in smaller chunks if bug persists.
